# Monitoring for Subrecipient Title VI Compliance

Describe how you monitor your subrecipients. This can be through site visits, submissions of Title VI Plans annually, or training and surveys.

☑ City of Bullhead City/ Public Transportation Programs does <u>not</u> monitor subrecipients for Title VI compliance.

## **Title VI Equity Analysis**

A subrecipient planning to acquire land to construct certain types of facilities must not discriminate on the basis of race, color, or national origin, against persons who may, as a result of the construction, be displaced from their homes or businesses. "Facilities" in this context does not include transit stations or bus shelters, but instead refers to storage facilities, maintenance facilities, and operation centers.

There are many steps involved in the planning process prior to the actual construction of a facility. It is during these planning phases that attention needs to be paid to equity and non-discrimination through equity analysis. The Title VI Equity Analysis must be done before the selection of the preferred site.

Note: Even if facility construction is financed with non-FTA funds, if the subrecipient organization receives any FTA dollars, it must comply with this requirement.

☑ City of Bullhead City/ Public Transportation Programs has no current or anticipated plans to develop new transit facilities covered by these requirements

## **Fixed Route Transit Provider Analysis**

Fixed Route: Public transit service (other than by aircraft) provided on a repetitive, fixed-schedule basis along a specific route, with vehicles stopping to pick up passengers.

A subrecipient providing fixed route service, as defined above, must determine the distribution of transit amenities or the vehicle assignments for each mode in a non-discriminatory manner. The subrecipient must develop policies to ensure service is not distributed on the basis of race, color, or national origin.

Effective practices to fulfill the Service Standards requirements include developing written policies covering each of the following service indicators: (can be expressed in writing or in table format – see Circular Appendix G & H pp. 87-91)

#### 1) Vehicle Load for Each Mode

The average ratio of passengers to seats on fixed route service provided by City of Bullhead City/Public Transportation Programs is 3:5. The average ratio for each individual route is as follows:

Red Line – 4:5 Blue Line – 3:5 Green Line - 2:5 Orange Line – 3:5

#### 2) Vehicle Headway for Each Mode

Vehicle headways for fixed route service provided by City of Bullhead City/Public Transportation Programs are one hour.

#### 3) On Time Performance for Each Mode

The weighted system average of on-time performance for City of Bullhead City/Public Transportation Programs fixed route system is 82 percent which means that 89 percent of all observed departures on all lines departed within zero to five minutes of their scheduled departure time.

#### 4) Service Availability for Each Mode

All four of the fixed route services operate during the same hours of the day and week, 6:00 AM - 7:00 PM Monday through Friday and 8:00 AM - 3:00 PM on Saturday. The routes have been designed to cover the four cardinal directions or the city (north, south, east, and west) to ensure the largest area and majority of members of the community have reasonable access to transit service and that popular and significant destinations are readily and easily accessible for anyone looking to use the service.

#### 5) Transit amenities for each mode

Trash receptacles are available at most stops, Trash receptacles are on all transit vehicles. Shelters with bench seats are available at our most heavily used stops. Bus stop signs are located at all stops with posted information for those individual stops. Riders guide with route maps are available on all transit vehicles.

#### 6) Vehicle assignments for each mode

Vehicles are assigned to routes based on several different factors. Primarily, vehicles are assigned on specific routes based on the replacement schedule for all vehicles so that appropriate mileage can be calculated for when a vehicle will need to be replaced. Vehicles are also assigned to routes in an effort to coordinate vehicle maintenance services making effective use of scheduled services brakes and route end times.
