LARGE AREA LANDSCAPE TURF REBATE PROGRAM

ABOUT THE REBATE PROGRAM

The purpose of the this Rebate Program is to help our property owners reduce their landscape water use by replacing their water thirsty grass with landscape materials that are appropriate for our desert climate. If you currently have a landscape consisting of grass, converting it into an attractive low-water using landscape is one of the best ways to conserve water and energy, save money on your water bill, and create a landscape that is much easier to maintain.

ELIGIBILITY

- A. Authorization to Proceed: Before removing any grass, an application, site plan showing project area and a description of the proposed conversion and pictures must be submitted to the City. The applicant must participate in a pre-conversion site inspection with City staff. Starting without City approval would make the conversion ineligible.
- B. Customer Eligibility: The property must be located within the city limits of Bullhead City. The applicant must be the property owner/Manager or Representative. The property that is the subject of the application may receive only one turf rebate annually. Large area conversion projects can be done in phases and applied for year over year as the City budget permits.
- C. Qualifying Areas: Areas to be converted must be a living maintained lawn or permanently-installed outdoor surface of water. The areas may not be left bare. Conversions must be turf to artificial turf, a combination turf to artificial turf and low-water using plant materials, turf to rock or combination of rock to low-water using plant materials.
- D. Compliance: The conversion must comply with the approved project site plan, all applicable city codes and in particular, Chapter 17.48 of the Bullhead City Municipal Code. This Chapter includes a list of permitted low-water using plant materials.

TERMS OF THE REBATE

- A. Annual Incentive Amounts: For this budget year the City has designated funds to be used for the Rebate and Water Conservation Programs. The City's fiscal year is July 1 through June 30. Projects are subject to the availability of funds and must take place during this budget year.

LARGE AREA LANDSCAPE TURF REBATE PROGRAM

- B. Incentive Amounts for Large Area Landscape Project Areas: The City is using the methodology set forth below for these projects.

Grass to artificial turf and grass to rock and low water using plants, or a combination of both, a dollar for dollar match rebate at a minimum of \$25,000 to a maximum of \$50,000 based upon the paid invoices/receipts submitted upon completion for that portion of the project on the subject parcel(s).

- Example; the applicant would need to spend \$50,000 on their project to receive the minimum rebate of \$25,000.

- C. Important Timelines and Deadlines: Within 6 months of approval of your application, you must complete your conversion and notify the City. The City will inspect completed projects for compliance. If the conversion fails inspection, you will be granted 60 days or the remainder of the 6-month period, whichever is greater, to attain compliance and notify the City.

- D. Licenses: Properties must use a business with a Bullhead City business license. You can contact the City at 928-763-0110 to inquire about the city business license.

- E. Rebates: **PLEASE SAVE ALL OF YOUR INVOICES/RECEIPTS.** The City must have the invoices/receipts to calculate the rebate. A check will be issued to applicant approximately 30-45 days after the final inspection.

- F. A signed W-9 form will be required with the application.

- G. **YOUR PROJECT REBATE MAY BE CONSIDERED TAXABLE INCOME.** Current law requires the city to issue form 1099 to applicants who receive rebate payments of \$600 or more. For more information on whether your rebate check will be considered taxable income, please contact a qualified tax professional (a number of governmental entities are urging congress to adopt amendments to the tax code which would no longer treat rebates as income).
