

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for Bullhead City Mohave PWS AZ0408032

Our water system violated drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During the 2023 compliance period we did not complete all monitoring or testing for VOCs, SOCs, and Nitrates and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for during the last year, how often we are supposed to sample for these contaminants and how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which follow-up samples were taken.

| Contaminant | Required sampling frequency | Number of samples taken | When samples should have been taken | When samples were taken |
|-------------|--|-------------------------|-------------------------------------|-------------------------|
| SOCs | 2 consecutive quarters every three years | 7 | 2021-2023 | August 2024 |
| VOC | 1 sample in Q3 | 1 | 2023 | December 2023 |
| VOC | 1 sample every three years | 1 | 2021-2023 | May 2024 |
| Nitrate | 1 sample every year in Q2 | 1 | 2023 | 2024 |

What is being done?

All required sampling has been successfully completed for this routine monitoring occurrence.

For more information, please contact City of Bullhead City – Utilities at 928-763-9400.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by the City of Bullhead City. State Water System ID#: AZ0408032.
Date distributed: October 2024.

¹ VOCs, also known as volatile organic compounds, are tested by collecting one sample and testing that sample for all the VOCs. VOCs are commonly used in industrial and manufacturing processes. VOCs include benzene, carbon tetrachloride, chlorobenzene, 1,2-dichlorobenzene, 1,4-dichlorobenzene, 1,2-dichloroethane, cis-dichloroethane, trans-dichloroethane, dichloromethane, 1,2-dichloropropane, ethylbenzene, styrene, tetrachloroethylene, 1,1,1-trichloroethane, trichloroethylene, toluene, 1,2,4-trichlorobenzene, 1,1-dichloroethylene, 1,1,2-trichloroethane, vinyl chloride, and xylene.
